7, Jalan Restu 5, Taman Sri Puteri, Meru, 41050 Klang, Selangor

Detail-oriented IT professional with hands-on experience in application support, ERP systems, API integrations, and technical operations across logistics and enterprise environments. Proven ability to support stakeholders, conduct system testing and audits, and collaborate cross-functionally to improve system reliability and user adoption. Seeking to grow in an application support or systems-focused role where technical expertise and problem-solving skills can drive operational excellence.

AREA OF EXPERTISE

Effective Communication	Problem Solving	Time Management
Attention to Detail	Collaboration & Team Work	Technical Support & IT Audit

PROFESSIONAL EXPERIENCE

IT Application Support, Zitron (M) Enterprise Sdn Bhd

Nov 2025 – Feb 2026

- Administer and support the company's ERP system, ensuring system availability, data accuracy, and smooth daily operations.
- Provide first-level IT application support to internal stakeholders via phone, email, and chat, resolving issues efficiently and escalating when needed.
- Conduct ERP functional and process testing to validate workflows, identify defects, and ensure system reliability before and after updates.
- Document test cases, system issues, and resolution outcomes to support troubleshooting, audits, and continuous system improvement.

Sales Enabler Executive, Ninja Van Logistics Sdn Bhd

Nov 2022 – Aug 2025

- Executed BAU operations, including IT audits and technical support, to ensure smooth daily operations for shippers and internal stakeholders.
- Facilitated shipper API integrations by conducting IT audits and streamlining onboarding processes, reducing integration delays and errors.
- Provided technical support via WhatsApp, resolving e-commerce platform integration issues promptly and improving shipper satisfaction.
- Delivered training sessions on the newly developed integration website, increasing internal adoption and operational efficiency.
- Collaborated with regional teams to review and resolve duplicate account cases, ensuring compliance and timely approval of API access.

Telemarketing Executive, UTS Sdn Bhd

Sept 2022 – Oct 2022

- Promoted affordable medical card insurance solutions to a broad customer base, increasing product awareness and lead engagement.
- Educated prospective customers on the importance of long-term financial and health protection, building trust and credibility through clear communication.
- Managed customer objections and rejections professionally, applying persuasive sales techniques to improve conversion rates.

Backend System Developer Intern,

Mar 2022 – Aug 2022

- Improved administration panel usability by enhancing UI components, resulting in a more intuitive and efficient user experience.
- Designed and implemented database tables to support system functionality, data integrity, and efficient data management.
- Developed administration panel features based on Figma designs, ensuring accurate implementation of functional and visual requirements.
